3. Installation

Main Part of Intercom

Back Panel

Wall-mounted hanging shell

Figure 1 Three Major Parts of i20S

Step 1: Installation preparation

A. Check the following contents:

- Hex wrench x 1
- RJ45 plugs x 2 (1 spare)
- KA4 x 25mm screws x 4
- 25mm screw anchors x 4

B. Tools that may be required:

- Hex wrench
- Phillips screwdriver (Ph2 or Ph3), hammer, RJ45 crimper
- Electric impact drill with an 6mm drill bit

Step 2: Drilling

Figure 2 Wall Mounting

- Place the mounting template with dimensions on the surface of a wall in a desired flat position.
- Use an electric drill to drill the 4 holes marked on the mounting template. It is recommended to drill about 30mm deep. Remove the template when finishing drilling.
- Push or hammer screw anchors into the drilled holes.

Step 3: Removing hanging shell

A. Remove the hanging shell in Figure 3 and Figure 4.

Figure 3

Figure 4

B. With Phillips screwdriver, unpacks the Back Panel and the main part of intercom as shown in Figure 5.

Figure 5

Step 4: Hanging shell Fixing and Cabling

Figure 6

A. Select the hole for cable supply; cable length of 15cm to 20cm is recommended.

B. With 4 KA4 x 25mm screws, tighten the Wall-mounted hanging shell as shown in Figure 6.

Step 5: Connection line

Figure 7

Figure 8

- A. Select the hole for cable supply.
- B. Connect the cables of RJ45, power, and electric-lock to the motherboard socket as mentioned in connectors description (refer to Section 2).
- C. Test whether there is electricity by doing the following:

Press the # button for 3 seconds to get the IP address of intercom by voice.

Input access password or press the indoor switch to check electric-lock installation.

Note: Do not proceed mounting until you have finished the electric checking.

Step 6: Mounting

Figure 9

Figure 10

- A. Use the 4 screws to tighten the main part of intercom on the back panel as shown in Figure 9.
- B. Push the device into the Wall-mounted hanging shell and tighten it with 1 screw as shown in Figure 10.
- C. Make sure the screws have been tightened properly for better waterproof effect.

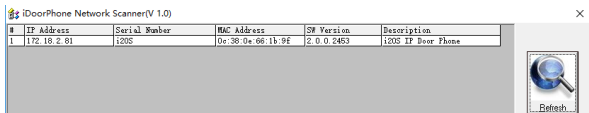

4. Searching Door Phone

There are two methods as shown below to search the i20S.

Method 1:

Open the iDoorPhone Network Scanner. Press the Refresh button to search the i20S and find the IP address.

(Download address <http://download.fanvil.com/tool/iDoorPhoneNetworkScanner.exe>)

#	IP Address	Serial Number	MAC Address	SW Version	Description
1	172.18.2.81	i20S	0c:38:0e:66:1b:9f	2.0.0.2453	i20S IP Door Phone

Method 2:

Press and hold the “#” key for 3 seconds and the door phone will report the IP address by voice.

Default Setting	
Default DHCP Client	On
Static IP Address	192.168.1.179
Default Web Port	80
Default Login User Name	admin
Default Login Password	admin
Display IP address	Hold # for 3 seconds to display by voice
Search Tools	iDoorPhone Network Scanner

5. SIP Door Phone Setting

Step 1: Login the homepage of the i20S.

Step 2: Add the SIP account.

Set SIP server address, port, user name, password and SIP user with assigned SIP account parameters.

Select "Activate", and then click Apply to save this setting.

Step 3: Setting DSS key

Set the DSS key as shown below for a quick start. Click "Apply" to save this setting.

Type: Hot Key

Number 1: The DSS Key will dial to this Number 1.

Number 2: If Number 1 is unavailable, it will be forwarded to Number 2.

Line: Working line

Subtype: Speed dial

Step 4: Door Phone Setting

The screenshot shows the 'EGS Setting' interface with the 'Features' tab selected. The 'Advanced Settings >>' section is expanded, displaying various configuration options for the door phone. The 'Local Password' field is highlighted with a red box.

Parameter	Value	Parameter	Value
Switch Mode	Monostable	Keypad Mode	Dial and Password
Switch-On Duration	5 (1-600)Second(s)	Talk Duration	120 (20-600)Second(s)
Remote Password	*	Local password	****
Description	i205 IP Door Phone	Enable Access Table	Enable
Hot Key Dial Mode Select	Main-Secondary	Call Switched Time	16 (5-50)Second(s)
Day Start Time	06:00 (00:00~23:59)	Day End Time	18:00 (00:00~23:59)
Address of Open Log Server	0.0.0.0	Port of Open Log Server	514
Enable Open Log Server	Disable	Enable Indoor Open	Enable
Enable Card Reader	Enable	Limit Talk Duration	Enable
Door Unlock Indication	Long Beeps	Remote Code Check Length	4 (1-6)

6. Door Unlocking Setting

Local

1) Local Password

Step 1: Go to EGS Setting → Features → Set **Local Password** (The default is "6789").

Step 2: Use the device's **Numeric Keyboard** to input **password** and **"#"** key, and then the door will be unlocked.

The screenshot shows the 'EGS Setting' interface with the 'Features' tab selected. The 'Common Settings' section is expanded, displaying various configuration options. The 'Local password' field is highlighted with a red box.

Parameter	Value	Parameter	Value
Switch Mode	Monostable	Switch-On Duration	5 (1-600)Second(s)
Enable Card Reader	Enable	Card Reader Working Mode	Normal
Limit Talk Duration	Enable	Talk Duration	120 (20-600) Second(s)
Remote Password	*	Local password	****
APP Door Open	Disable	APP Password	*
Enable Indoor Open	Enable	Enable Access Table	Enable
Description	i205 IP Door Phone	Enable Open Log Server	Disable
Address of Open Log Server	0.0.0.0	Port of Open Log Server	514
Door Unlock Indication	Long Beeps	Remote Code Check Length	4 (1-11)

2) Private Access Code

Step 1: Go to EGS Access → Access Rule → set Access Code.

Step 2: Use the device's Numeric Keyboard to input password and “#” key, and then the door will be unlocked.

The screenshot shows the 'Access Table >>' section with a table containing one entry:

Index	Name	ID	Department	Position	Location	Number	Fwd Number	Access Code	Double Auth	Profile	Type	Issuing Date	Card State
1	BBK							1234	Disable	None	Guest		Enable

Below the table is the 'Add Access Rule' form with the following fields:

- Name: BBK
- ID: [dropdown]
- Card State: Enable
- Department: [input]
- Position: [input]
- Type: Guest
- Location: [input]
- Number: [input]
- Fwd Number: [input]
- Access Code: 1234
- Double Auth: Disable
- Profile: None

Remote

Remote Password

Step 1: Go to EGS Setting → Features → Set Remote Password (The default is “*”).

Step 2: To answer the call made by visitor via SIP phone, press the “*” key to unlock the door the visitor.

The screenshot shows the 'Features' tab with 'Common Settings' displayed:

- Switch Mode: Monostable
- Enable Card Reader: Enable
- Limit Talk Duration: Enable
- Remote Password: [dropdown menu]
- APP Door Open: Disable
- Enable Indoor Open: Enable
- Description: 1205 IP Door Phone
- Switch-On Duration: 5 (1-600) Second(s)
- Card Reader Working Mode: Normal
- Talk Duration: 120 (20-600) Second(s)
- Local password: ****
- APP Password: [input]
- Enable Access Table: Enable
- Enable Open Log Server: Disable

RFID Card

Step 1: Go to EGS Access → Enter the Name and ID Number (Only Front 10 yards) → Press Add to Access Table.

Step 2: Use pre assigned RFID cards to unlock the door by touching RFID area of device.

The screenshot shows the 'Add Access Rule' form with the following fields:

- Name: Hugo
- ID: 0123031310
- Card State: Enable
- Department: [input]
- Position: [input]
- Type: Guest
- Location: [input]
- Number: [input]
- Fwd Number: [input]
- Access Code: [input]
- Double Auth: Disable
- Profile: None
